NOX Heritage

WHO
WE ARE

OUR HERITAGE HAS DEFINED
OUR EXPERIENCE AND
PHILOSOPHY.

Rooted in a chemical engineering company established in 1966, NOX Corporation has built its core expertise in producing and processing various resin compounds for applications from consumer to industrial goods.

With this heritage, NOX Corporation was founded in 1994, as family owned company, focusing on LVT flooring innovation, design and manufacturing for global customers.

NOX Promise

WHAT WE
DELIVER

ENABLES ITS CUSTOMERS
TO DIFFERENTIATE,
GROW AND LEAD.

CONTROL: Delivered with Quality

NOX is the only LVT manufacturer producing not only superior quality in our finished product but in all the components. This includes every layer and every process from Calendering to Printing and Lamination. As a result, we can promise to control the quality of all these components and the ability to deliver our products on time, without defects.

CAPABILITY: Customized Innovation

Over 4,000 visual libraries, 5 different installation fits, different edge cuttings, +10 thickness each layer & the World's First Click LVT, NOX provides new opportunities with proven

performance of First-to-market creation in both product and manufacturing. NOX promises to serve specific markets and needs of our individual customers.

CAPACITY: Reliable Growth

As one of the largest LVT manufacturers globally, and bringing our capacity to over 50 million square meters annually, NOX operates with the commitment of investment for our customers needs allowing stable and significant growth for customers.

NOX Difference

WHAT WE DELIVER

Globally, NOX continue to lead the industry w/ innovation & expertise

NOX IVP

Since year 2000, NOX (IVP) Integrated Vertical Production System is the World's First & Only LVT production process ensuring superior quality control and ability to meet the different needs of our customers.

NOX EPT™ Shield & EMT™ Core-A Global Leader

With more than 50 years of proven success, NOX EPT™ shield & EMT™ core has been the foundation for innovation, i.e. Click LVT and Loose-lay in 2005, providing the most stable and eco-friendly products which are applied for both PVC and NON-PVC resin compounds.

Installation Guidelines

- Prior to installation, the subfloor must be heated for -14 days if heating is available, and if not, allow sufficient time to dry out completely.
- Room temperature must be maintained at 18°C or higher before and during installation.
- The flooring must be allowed to acclimate in the room to be installed for a minimum of 24 hrs. and be stacked flat on the floor to avoid bending the floor.
- Prior to installation, please ensure that both color and lot# are the same.
- When installing, be sure to keep dust, dirt or foreign particles away from the locking strip.

Maintenance

- Regularly sweep floor to remove sand and grit that can scratch the floor.
- For best results, use only water with a mop. Avoid flooding the floor with too much water.
- For heavily soiled areas, use a neutral ph balanced floor center.
- Use caution when lifting boxes.
- Promptly remove any standing water to avoid slippage.
- Keep on the flat surface to keep it from warping.
