

## Product Specification

### Classification

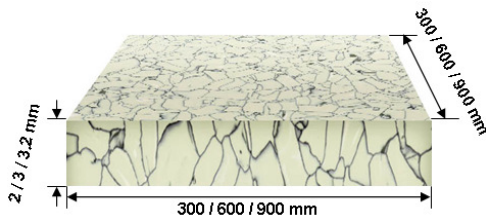

LG Hausys floors [ STATIC PULSE ] : Specialty / ESD Control Flooring / Static Pulse

### Introduction

Feature of ESD Control System

- The most effective control of electrostatic discharge ESD sensitive environments

### Structure

### Characteristics / Advantage

- Available in either dissipative or conductive range to safely remove static charge in any work environment
- Superior static control terminates static generation protecting sensitive equipment.
- Excellent flexibility reducing breaking and cracking at corners
- Superior dimensional stability, in-square quality, and straight edges and corners resulting in fewer gaps
- Excellent surface gloss to give long term clean appearance.

### Application

Clean rooms / Access flooring / Healthcare / Electronics manufacturing assembly / test areas /  
Computer and electronic equipment / Telecommunications environments, etc.
